

SURVIVE-TO-THRIVE: TRANSPORTATION

Reliable transportation is needed to maintain employment, make appointments, and attend counseling and group sessions. Walking can be a severe deterrent to completing reentry tasks.

BUS PASSES

Suppose a participant travels to the Navajo County Government offices in Holbrook or across town for work. In that case, a bus pass can come in handy. There are several options to acquire bus passes. We offer them freely to recently enrolled program participants. If a participant makes an appointment with Arizona @ Work and enrolls in their program, they may receive bus passes. Participants staying at Salvation Army's transitional housing receive bus passes. Sometimes the RE:center accepts benevolence requests for bus passes. Please see bus routes and schedules in this packet.

BIKES

Some participants may prefer to ride a bike over waiting for the bus. Please talk to a RE:center staff member about different options in procuring a bike. There may be funds available or donated bikes to be given. However, this usually does not happen until we know the participant is committed to a program.

PERSONAL VEHICLES (Community Mentors Only)

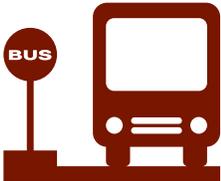

If you are comfortable driving a participant in your vehicle, this is another transportation option; however, it is not a program requirement. We do not expect you to be a taxi service for the participant, but if you are willing and able, we ask that you offer rides. Always set boundaries with your participant in this area. They must not expect a ride whenever they may want one. If giving a ride will improve program adherence, promote healthy relationship development, and help them reach their goals, we encourage you to lend a hand in this way. We ask that you provide program coordinators with proof of a valid driver's license and vehicle liability insurance.
